smarten up a LAUNDRY ROOM

Breeze through heaps of clothes by stealing designer Bria Hammel's nifty tricks for maximizing every inch.

1 INSTALL A WORK LEDGE.

Think of it as a handy surface where you can lay out stained items to be pre-treated or fold things fresh from the dryer.

2 PICK BETTER HAMPER.

Baskets on wheels make it easier to move clothes to and from the washer and dryer and around the house as needed.

3 ADD MORE HANGING BARS.

Fill unused wall space with simple tension rods for air-drying and to hold freshly laundered items before they go to the closet.

upgrade a BOOKCASE

Line your shelves with baskets to conceal toys and label them with easy-to-change paper tags. So smart: Designer Jean Liu also relies on casters to make cleaning behind bookcases simpler. You can add them to a short shelf you already have!

revive a plain BATHROOM

You're just three steps away from a lighter, brighter, more functional space — no renovation required.

1 BRING IN A GARDEN STOOL.

This do-it-all piece of furniture is perfect for holding overflow items from a small shower or as a movable place to perch while bathing kids.

2 SWAP IN NEW LINENS.

An all-white bathroom is timeless, but introduce a punchy shower curtain for a low-commitment pop of color and pattern.

3 USE THE TOILET TANK LID AS A SHELF.

A pedestal sink doesn't offer much surface area. Store must-haves on a tray so that if you need to open the tank, you can pick everything up at once.
