

YOU CAN  
HAVE A [FABULOUS]  
**home office**  
*in any space*

**Put the desk center stage.**

Take a cue from interior designer Bria Hammel and position your work spot away from the wall in the middle of the room. With both desk and chair facing the door, the area instantly feels bigger.

## Set up shop in an armoire.

When you tuck the essentials into a deep furniture compartment, you can temporarily close the door on a project when company's coming. "Don't worry if a piece overlaps a window slightly," adds Hammel. Just skip curtains.

## Pull a chair up to a console table.

A surface of just about any size can be converted into a place to cross off to-do's. To help this mini home office blend with the room, interior designer Megan Hopp chose light furniture to match the wall color.
